

**REPORT**  
**OF**  
**INTERNSHIP REPORT ON**  
**GeeksforGeeks**  
**CAMPUS MANTRI PROGRAM**

Submitted To  
**School of Computer Science and Engineering**  
**IILM University, Greater Noida, U.P.**

In partial fulfilment of the requirement of degree of  
**B.Tech CSE**

By  
**Roll Number of Student: 2410030241**  
**Name of Student: GOPAL AGARWAL**  
**Batch: 3CSE2**

**2026–27**

## INTERNSHIP COMPLETION CERTIFICATE

*GeeksforGeeks Campus Mantri Program Certificate*

## **CANDIDATE'S DECLARATION**

I, Gopal Agarwal, a student of B.Tech (Computer Science and Engineering), Batch 3CSE2, Roll Number 2410030241, studying at the School of Computer Science and Engineering, IILM University, Greater Noida, U.P., hereby declare that the internship report entitled “Internship Report on GeeksforGeeks Campus Mantri Program” submitted by me is a bona fide and authentic record of the work carried out by me during my participation in the GeeksforGeeks Campus Mantri Program.

I further declare that the information and material presented in this report are based on my own experience, participation, and the documentation gathered by me during the course of the program, and that this report has not been submitted, in part or in full, to any other university or institution for the award of any degree, diploma, or similar title.

Student Name: Gopal Agarwal

Roll No.: 2410030241

Batch: 3CSE2

Date: 8-june-2026

## **ACKNOWLEDGEMENT**

I would like to express my sincere gratitude to GeeksforGeeks for selecting me as a Campus Mantri for the year 2026 and for providing me with this valuable opportunity to enhance my technical, leadership, and communication skills through structured, real-world engagement with the student community.

I am thankful to the GeeksforGeeks Team for their continuous guidance, timely communication, and support extended to me throughout the duration of the program, which enabled me to carry out my responsibilities as a Campus Mantri effectively.

I would also like to extend my heartfelt thanks to the School of Computer Science and Engineering, IILM University, Greater Noida, U.P., for their encouragement and for providing me the academic platform to undertake, document, and present this internship report as part of my curriculum.

Finally, I am grateful to my family, friends, faculty mentors, and fellow Campus Mantris for their constant support, motivation, and cooperation throughout this journey.

Signature: \_\_\_\_\_

Student Name: Gopal Agarwal

Roll No.: 2410030241

## **CHAPTER 4**

### **PROJECT DESCRIPTION**

#### **4.1 INTRODUCTION**

---

GeeksforGeeks is a widely used computer science portal that provides learning resources, tutorials, articles, and practice material in the areas of programming, data structures and algorithms (DSA), and other core computer science subjects. To strengthen its outreach within engineering colleges and universities, GeeksforGeeks runs the Campus Mantri Program, under which selected students are appointed as official student representatives, referred to as Campus Mantris, on their respective campuses.

As part of my B.Tech (Computer Science and Engineering) curriculum at the School of Computer Science and Engineering, IILM University, Greater Noida, U.P., I was selected as a Campus Mantri for GeeksforGeeks for the year 2026. This report documents my participation, responsibilities, activities, and learning outcomes during the course of the program.

This report is organized to describe the organization profile of GeeksforGeeks, the problem the Campus Mantri Program addresses, the objectives and scope of my involvement, the technologies and tools used, the system architecture (workflow) governing the program, the methodology followed, the expected outcomes, and the supporting evidence collected during the internship period.

## 4.2 ORGANIZATION PROFILE

---

GeeksforGeeks is a computer science portal that provides study material, tutorials, and practice resources for students and professionals preparing for academic examinations, technical interviews, and competitive programming. The platform covers subjects such as Data Structures and Algorithms, programming languages, web development, and emerging technologies, and also offers structured online courses, including courses on database technologies such as MongoDB.

Through its Campus Mantri Program, GeeksforGeeks collaborates with students across colleges and universities to spread awareness of its learning resources, promote participation in its courses and events, and build a stronger technical community on campus.

### 4.3 PROBLEM STATEMENT

---

Many students, particularly in their early years of engineering education, are not fully aware of structured resources available for learning Data Structures and Algorithms, database technologies, and other skills relevant to technical interviews and placements. There is often a gap between the resources offered by platforms such as GeeksforGeeks and their actual reach and adoption within a given campus.

The Campus Mantri Program is designed to address this gap by appointing a student representative on each campus who can communicate relevant opportunities, courses, and events to fellow students, encourage participation, and act as a coordination point between GeeksforGeeks and the student community.

## 4.4 PROJECT OBJECTIVES

---

The key objectives undertaken as a GeeksforGeeks Campus Mantri were as follows:

1. To promote awareness of GeeksforGeeks resources, courses, and learning material among students on campus.
2. To assist and encourage students in preparing for coding interviews and campus placements.
3. To organize and promote technical workshops and sessions related to Data Structures and Algorithms on campus.
4. To act as a coordination point between GeeksforGeeks and the student community.
5. To encourage student participation in GeeksforGeeks courses, such as the MongoDB course.
6. To build and maintain a consistent promotional presence for GeeksforGeeks activities on professional platforms such as LinkedIn.
7. To gather feedback from students regarding their learning needs and interests.
8. To document tasks, activities, and communications undertaken during the program.
9. To develop personal leadership, communication, and event-coordination skills through practical engagement.
10. To contribute toward community building and technical culture within the campus.

## **4.5 SCOPE OF THE PROJECT**

---

The scope of this internship is limited to the duration and activities defined under the GeeksforGeeks Campus Mantri Program, valid for six months from 25th June 2026. It covers campus-level promotional activities, communication with the student community, coordination with the GeeksforGeeks Team, and completion of assigned tasks such as course-completion promotions and event coordination.

The scope does not extend to the internal software development, platform engineering, or curriculum design of GeeksforGeeks itself; the role is centered on outreach, communication, and community engagement on behalf of the platform.

## 4.6 TECHNOLOGIES AND TOOLS USED

---

The following technologies, platforms, and tools were used during the course of the program:

**Table 4.1: Technologies and Tools Used**

| Category                        | Tools / Platforms                                                                                                       |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Technical & Learning Platforms  | GeeksforGeeks Portal, GeeksforGeeks Campus Mantri Dashboard, GeeksforGeeks MongoDB Course                               |
| Communication & Promotion Tools | LinkedIn, Official Email (GeeksforGeeks Team correspondence), GeeksforGeeks community channels                          |
| Productivity Tools              | Microsoft Word, Microsoft PowerPoint (for documentation and reporting)                                                  |
| Technical Skills                | Data Structures and Algorithms (DSA) awareness, fundamentals of MongoDB, event coordination and community communication |

These tools and platforms supported the promotional, communicative, and documentation-related responsibilities carried out during the internship; they do not represent software developed by the student.

## 4.7 SYSTEM ARCHITECTURE

---

The overall engagement model of the GeeksforGeeks Campus Mantri Program can be represented as a workflow that begins with GeeksforGeeks as the parent organization and flows through the Campus Mantri Program to individual Campus Mantris, who then communicate with and engage the student community, gather feedback, and ultimately contribute to broader community development.

**Figure 4.1: GeeksforGeeks Campus Mantri Community Engagement Workflow**

## 4.8 METHODOLOGY

---

The methodology followed during the internship consisted of the following stages:

- 1. Understanding the Program:** Reviewing the objectives, structure, and expectations of the GeeksforGeeks Campus Mantri Program upon selection.
- 2. Receiving Information:** Receiving official communication from the GeeksforGeeks Team regarding onboarding, dashboard access, and program guidelines.
- 3. Planning:** Planning the approach for promoting GeeksforGeeks resources and courses among students on campus.
- 4. Student Engagement:** Engaging with students to create awareness about GeeksforGeeks resources, courses, and upcoming opportunities.
- 5. Event and Activity Promotion:** Promoting and participating in technical sessions and activities, such as AI/DSA sessions, on campus.
- 6. Task Completion:** Completing tasks assigned through the Campus Mantri Dashboard, such as the MongoDB course-completion task, and submitting proof of completion.
- 7. Coordination and Communication:** Coordinating with the GeeksforGeeks Team and maintaining regular communication regarding tasks, deadlines, and updates.
- 8. Learning and Improvement:** Learning new technical concepts (such as MongoDB fundamentals) as part of task requirements and applying feedback to improve future activities.
- 9. Documentation:** Documenting activities, communications, and evidence collected throughout the program for reporting purposes.

## 4.9 EXPECTED OUTCOMES

---

Participation in the GeeksforGeeks Campus Mantri Program was expected to contribute to the following outcomes:

- Increased technical awareness of Data Structures and Algorithms and related subjects among the student community.
- Development of leadership qualities through representing GeeksforGeeks on campus.
- Improved communication skills through regular interaction with students and the GeeksforGeeks Team.
- Strengthened teamwork through coordination with fellow Campus Mantris and student groups.
- Practical exposure to event management through organizing and promoting technical sessions.
- Expanded professional networking through engagement with the GeeksforGeeks community and platforms such as LinkedIn.
- Contribution to community building and a stronger technical culture on campus.
- Overall professional development through structured, real-world responsibility and task ownership.

## 4.10 CERTIFICATES OF COMPLETION AND COMMUNICATION PROOF

This section presents the supporting evidence collected during participation in the GeeksforGeeks Campus Mantri Program, including the official certificate, dashboard records, official communication, and promotional activities carried out as part of the assigned tasks.
