

DATA ANALYTICS ESSENTIALS

Internship / Training Presentation

PRESENTED BY

Gopal Agarwal

Roll No.: 2410030241

Degree: B.Tech – Computer Science & Engineering

Batch: 3CSE2

Academic Session: 2026–27

Candidate & Program Overview

Candidate Details

STUDENT NAME

Gopal Agarwal

ROLL NUMBER

2410030241

DEGREE

B.Tech – Computer Science & Engineering

BATCH

3CSE2

UNIVERSITY

IILM University, Greater Noida, U.P.

Program Details

PROGRAM

Data Analytics Essentials

PLATFORM / INITIATIVE

Cisco Networking Academy

OFFERED THROUGH

IILM University

INSTRUCTOR

Swati Vashisht

COMPLETION DATE

14 June 2026

About Cisco Networking Academy

Cisco Networking Academy is a global technology-focused learning ecosystem that helps students build industry-relevant digital skills through structured, self-paced and instructor-supported courses.

Technology-Focused Learning

A structured ecosystem designed to build digital and technical literacy.

Industry-Relevant Skills

Courses designed around practical, current technology domains.

Structured Technical Education

Well-organized modules that build concepts step by step.

Practical Understanding

Helps learners understand modern technology domains conceptually.

Career Support

Supports students and learners developing technology-oriented careers.

NETWORK & DATA LEARNING ECOSYSTEM

Illustrative Concept

Data Analytics Essentials

Data Analytics Essentials introduces the fundamental concepts required to understand how data can be transformed into meaningful information and insights, forming a strong conceptual foundation for further study in analytics.

Understanding Data

Data-Driven Thinking

Data Interpretation

Identifying Meaningful Information

Analytical Reasoning

Supporting Data-Driven Decisions

Data

Processing

Analysis

Insights

Decision Making

Industry Context & Data Challenge

THE CHALLENGE

Organizations generate large volumes of data, but raw data alone does not automatically provide useful information.

KEY CHALLENGES

- Large volumes of data
- Difficulty interpreting raw information
- Identifying useful patterns
- Converting information into insights
- Supporting effective decision-making

Data analytics helps organizations understand information systematically and use insights for better decisions.

Core Learning Objectives

1. Understand fundamental data analytics concepts.

2. Develop analytical thinking.

3. Understand the importance of data.

4. Learn how information can be interpreted.

5. Understand data-driven decision-making.

6. Build a foundation for advanced analytics.

7. Connect data concepts with real-world applications.

8. Build readiness for future data-related projects.

Key Concepts & Knowledge Areas

Data Understanding

Understanding data as a valuable resource.

Data Analysis

Examining information to identify useful insights.

Data Interpretation

Converting analyzed information into understandable conclusions.

Analytical Thinking

Approaching problems using evidence and structured reasoning.

Data-Driven Decision Making

Using insights obtained from data to support decisions.

Data Applications

The role of analytics in modern technology and business.

Data Analytics Workflow

Conceptual Data Analytics Workflow

Data Analytics Ecosystem

The diagram represents the broader data analytics ecosystem and conceptual learning areas.

Learning Methodology

Each step builds progressively — from foundational concepts to real-world application readiness.

Learning Outcomes

Improved understanding of data analytics

Better analytical thinking

Understanding of data interpretation

Awareness of data-driven decision-making

Stronger foundation for Data Science

Foundation for AI & Machine Learning

Improved problem-solving approach

Increased interest in data-oriented projects

Applications of Data Analytics

Business Intelligence

Artificial Intelligence

Machine Learning

Data Science

Marketing Analytics

Financial Analytics

Operations

Customer Analytics

Decision Support

Skills Developed

Technical / Analytical

- Data Analytics Fundamentals
- Data Interpretation
- Data-Oriented Thinking
- Analytical Reasoning
- Understanding Data Workflows

Professional

- Problem Solving
- Structured Thinking
- Continuous Learning
- Technical Awareness
- Data-Driven Approach

CERTIFICATION

Certification & Official Verification

Official Certificate of Completion

Thank You

Data Analytics Essentials provided a strong foundation for understanding data, analytical thinking, interpretation, and data-driven decision-making.
